Project Engineer

Wipro

Java Developer

SKILLS

- Java
- Data Structures and Algorithms
- Spring, Spring boot
- My SQL
- HTML, CSS, JavaScript
- Git and GitHub
- Microservices(basics)
- C / C++ (fundamentals)

PROJECTS

Weather App using HTML, CSS, JavaScript

The Weather API provides the information according to the location entered by the user. The API requests were made asynchronously using JavaScript built-in fetch. The Weather API provides the information, including current conditions, conditions, location, temperature etc..

News App using HTML, CSS, JavaScript

The News API provides the information according to the input that is entered by the user and display the news according to that. I made this by using the NEWS API where it can collect the only image exist news and display the news according to that in the website.

Personal Portfolio using HTML, CSS, JavaScript

The Personal Portfolio describes about me like what I'm passionate about and my skills and what do I Want to become and there is contact form by filling that u are able to contact me about the work. I can also make the portfolio as responsive by using CSS Media Queries so that it can be able to see in the smaller devices like Mobile phone etc..
